| <p>It is important to send whole blood (EDTA) specimen in primary tube (do not aliquot, centrifuge, freeze). 6-thioguanine nucleotides and 6-methylmercaptopurine analytes is mesured by LC-MS/MS. RBC count is also performed. Final results are expressed as pmol/8 x 10<sup>8</sup> RBC for 6-thioguanine nucleotides and 6-methylmercaptopurine derivatives. Hemolyzed samples are rejected. Because, hemolysis will lead to an artificially lower RBC count that could falsely increase the test results. It s crucially important transport conditions.</p> |                                                                       |                 |        |           |

|                                                                                                                                                                                                                                                                                                                                                                                                                                           |                                                                                          |                         |        |           |

|                                                                                                                                                                                                                                                                                                                                                                                                                                           | Plasma (EDTA)                                                                            | Lavender (EDTA)         | 2mL    | 2-8°C     |
| Additional Information                                                                                                                                                                                                                                                                                                                               |                                                                                          |                         |        |           |
| <p>Panel Contains; Whole Blood Count, Prothrombin time (PT), aPTT, Glucose, Fasting, Hemoglobin A1c (HbA1c), Thyroid Stimulating Hormone (TSH), Hepatitis B s Antigen (HBsAg), Hepatitis B s Antibody (anti-HBs), HIV Antibody (1-2) + p24 Antigen, Hepatitis C Antibody (anti-HCV), Rubella Antibody, IgM, Toxoplasma Antibody, IgM, Cytomegalovirus (CMV) Antibody, IgM. . All sample types defined in the test panel are required.</p> |                                                                                          |                         |        |           |

**5**

**Candida DNA (PCR)**  
 Test Code : **8748101** - Laboratory Services

Method : **MULTIPLEX PCR** - Performed : **Mon-Fri** - Reported : **3 days**

| Sample Name        | Container              | Amount | Transfer |
|--------------------|------------------------|--------|----------|
| Other              | Call the Laboratory    |        | 2-8° C   |
| Aphth Material     | Plastic Collection Cup |        | 2-8°C    |
| Whole Blood (EDTA) | Lavender (EDTA)        | 3mL    | 2-8°C    |
| Biopsy Material    | Plastic Collection Cup |        | 2-8°C    |
| Skin Scraps        | Plastic Collection Cup |        | 2-8°C    |

Additional Information 

This panel includes; Candida albicans, Candida glabrata, Candida krusei, Candida parapsilosis, Candida tropicalis, Candida spp.

**Allergic Diseases Panel**  
 Test Code : **8925630** - Laboratory Services

Methodology : - Performed : **Mon-Thu 08:00 Fri 08:00** - Reported : **Tue-Fri 18:00 Mon 18:00**

| Specimen Type | Container      | Volume | Transport |
|---------------|----------------|--------|-----------|
| Serum         | Separator Tube | 2mL    | 2-8°C     |

Additional Information 

This panel includes; IgE, Total, Specific IgE- Cow s Milk (f2), Specific IgE- Egg White (f1), Specific IgE- Egg Yolk (f75), Specific IgE- Dermatophagoides pteronyssinus (d1), Specific IgE- Dermatophagoides farinae (d2), Specific IgE- Mold mix 1 (mx1), Specific IgE- Grass mix 3 (gx3), Specific IgE- Cage Bird Feather Mixture (ex72), Specific IgE- Cat Epithelium-Dander (e1), Specific IgE- Dog Epithelium (e2), Specific IgE- Tree Mix (tx7).
