Samples sent for flow cytometry should be at least 5 ml and in the tubes with EDTA (purple cap). Body fluid samples should be transferred in at least 6 ml tubes with EDTA. All samples should be transported to the laboratory at 18-24°C and under appropriate conditions. Bronchoalveolar lavage samples should be transported to the laboratory at +4°C. <p style="text-align: center;">Please call to determine the closest sample delivery point to you.</p>
